Message from B.A.R.K. Director – Dr. John-Tyler Binfet

The 2014-2015 academic year marked B.A.R.K.’s 3rd year in operation. Thanks to continued support from both the AVP, Students’ Office, and the Faculty of Education’s Innovative Learning Centre, B.A.R.K. offered Drop-In and Outreach programs. This year also saw B.A.R.K. conduct its second Randomized Controlled Study examining the effects of animal-therapy on university students’ perceptions of stress. Over 2,500 UBC students participated in B.A.R.K. programs this year.

Introduction

Standing for “Building Academic Retention Through K9’s”, B.A.R.K. is a dog therapy program run under the direction of Dr. John-Tyler Binfet at the University of British Columbia, Okanagan Campus. B.A.R.K. brings together university students and trained therapy dogs and handlers in an effort to reduce stress, combat homesickness, foster interpersonal connections, and promote the overall social-emotional well-being of students.

“I got a chance to laugh, calm down, love dogs, and forget about everything that was troubling me and be happy.”
- B.A.R.K. Participant
Mission Statement

B.A.R.K. (Building Academic Retention through K9s) is a research-driven programme designed to support the social and emotional well-being of university students, primarily first-year students grappling with challenges around homesickness, social isolation, and integration into the university community. B.A.R.K. programming consists of both intervention studies and a community drop-in service.

B.A.R.K. upholds the following core beliefs and values:

1. Community members play a key role in enhancing research initiatives on campus. B.A.R.K. volunteer dog handlers contribute enormously to both research protocols and to enriching students’ experiences on campus.
2. B.A.R.K. research and Drop-in programmes provide a framework for mentoring student scholars and volunteers.
3. B.A.R.K. is committed to supporting diversity and strives to create working climates where everyone is welcome, recognized, and invited to contribute.
4. B.A.R.K. is committed to community partnerships and to this end supports the efforts of local animal-welfare groups (e.g., Paws it Forward, Kelowna SPCA).
5. B.A.R.K. is committed to upholding the highest standards of research. This includes adhering to both Human Behavioural Research Ethics Standards and to Animal Welfare Ethics Standards, using experimental designs that include the randomization of participants into treatment and control conditions, and including follow-up assessments of treatment effects as part of methodological designs.
6. B.A.R.K. is committed to giving back to the university community and pledges to have an active presence in student and university initiatives (e.g., CREATE, THRIVE).

Drop-Ins

Community Initiatives
In response to the demand for access to B.A.R.K.’s therapy dogs and recognizing that not all students can make it to the B.A.R.K. Lab in EME 1123, we launched BARK2GO! BARK2GO strategically situates dogs throughout the university campus with teams consisting of a B.A.R.K. Dog Handler, trained therapy dog, and volunteer student facilitator. BARK2GO provides opportunities for students to connect with canines on campus and the response to date has been very positive with 893 students making use of this new program in the Winter II term of 2015. Dogs are situated in the Library, FIPKE, and EME buildings.

“Petting the dogs lowered my stress and gave me the only thing I had to look forward to.”
-B.A.R.K. Participant
Drop-Ins

In addition to conducting research examining the effects of animal-assisted therapy on university students’ perceptions of stress, homesickness, and campus affinity, B.A.R.K. offers “Drop-In” sessions in EME 1123, the Faculty of Education’s Innovative Learning Centre. Twelve to 15 dogs and handlers typically participate in each these sessions and sessions are scheduled on Tuesdays and Fridays throughout the school year. The intent of the Drop-Ins is to provide a relaxed atmosphere in which students may de-stress while visiting therapy dogs. Drop-In sessions are entirely volunteer-run with Dr. Binfet leading a team of up to 14 student volunteers who help with set-up, facilitating interactions, and cleanup. The B.A.R.K. team tracks how many students attend Drop-In sessions and asks students to complete a quick pre- and post-stress scale. In the 2014-2015 academic year, a total of 15 Drop-In sessions were held that saw a total of 1,528 students attend.
